## Special Instructions

- Ruled booklets to be used.
- Only approved calculators allowed.

[MARKS]

[14] 1. (a) Find 
$$\lim_{x \to -4} \frac{x^2 + 28x + 96}{4x^2 + 7x - 36}$$
.

- (b) Find  $\lim_{x\to 2} \frac{4-\sqrt{6x+4}}{3x^2-12}$ .
- (c) Give an example of a function f defined for all real numbers which has the property that  $\lim_{x\to +\infty}$  and  $\lim_{x\to -\infty}$  are both equal to  $+\infty$ .

[14] 2. Find the derivatives of the following functions. YOU DO NOT HAVE TO SIMPLIFY.

(a) 
$$f(x) = \frac{3^4}{\sqrt{x^7}} - 30x^2 - e^x$$
.

(b) 
$$g(x) = \left(5\sqrt{x} - \frac{7}{x} + 6x - 8\right)(4x^5 - \ln(x) - e^2x).$$

(c) 
$$h(x) = x^3 \ln(x) - \frac{4}{5x} - e^{(-x^2+7)}$$

[8] 3. Use implicit differentiation to find y' = dy/dx

$$2x^5y^3 - 5x^3 + y^2 \ln x = 7y + 4x + 7.$$

[6] 4. Find dh if  $h = x^{1.5}$ , x = 4, and the change in the x is 0.1.

[14] 5. Boyle's law for enclosed gases states that if the volume is kept constant, the pressure P and temperature T are related by the equation

$$\frac{P}{T} = k$$

where k is a constant. If the temperature is increasing at 3 kelvin per hour, what is the rate of change of pressure when the temperature is 250 kelvin and the pressure is 500 pounds per square inch?

- [8] 6. Use the price-demand equation p = 60 0.02x to find the values of p for which the demand is elastic and for which the demand is inelastic.
- [6] 7. For  $f(x) = x^3 6x^2 + 9x 6$  find the absolute maximum and minimum, if either exists, on the interval [-1, 2]
- [14] 8. Graph the sales function  $N(x) = 3x^3 0.25x^4 + 200$ , over the interval  $0 \le x \le 9$ . Determine when N is increasing, when it is decreasing. Does N have a maximum? If so, find it. Does N have a point of inflection? If so, find it.
- [6] 9. Compute the following:
  - (a)  $\int (4x^3 7x^5) dx$ .
  - (b)  $\int_{2}^{3} \left(3x \frac{6}{x} + 4e^{x}\right) dx$ . Get the answer correct to three decimal places.
- [10] 10. Suppose that a country has Lorentz curve of the form  $f(x) = x^a$  and a Gini index of 0.268. Find a.
